Hazardous substance identification

septDES GEL

Hazards for employees and environment

H225 Highly flammable liquid and vapour.. H319 Causes serious eye irritation.. H412 Harmful to aquatic life with long lasting effects.

No special hazards have to be mentioned. The product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms.

Precaution measures and instructions

General protective and hygiene measures

Do not inhale gases/vapours/aerosols. Observe the usual precautions for handling chemicals. Do not eat, drink or smoke during work time. Take off immediately all contaminated clothing.

Keep container tightly closed. Use only in well-ventilated areas. Handle and open container with care.

Technical and organisational protection measures to prevent exposure

Advice on protection against fire and explosion: Keep away from sources of ignition - No smoking. Vapours can form an explosive mixture with air.

Further information on storage conditions: Keep at temperature not exceeding 30 °C.

Personal protective equipment

Eye protection: Tightly fitting safety glasses

Hand protection: Protective gloves

Body protection: Clothing as usual in the chemical industry.

Behavior in case of danger

Suitable extinguishing media: Water mist, Alcohol-resistant foam, ABC powder, Dry chemical extinguisher

Non suitable extinguishing media: Full water jet

Use personal protective clothing. Ensure adequate ventilation. Keep away sources of ignition. Use breathing apparatus if exposed to vapours/dust/aerosol.

Do not discharge into the drains/surface waters/groundwater.

Pick up with absorbent material (eg sand, kieselgur, acid binder, universal binder, sawdust). Dispose of absorbed material in accordance with the regulations.

In case of combustion use a suitable breathing apparatus. Wear protective clothing.

First aid

Remove contaminated, soaked clothing immediately and dispose of safely.

In case of accident or if you feel unwell, seek medical advice immediately.

After inhalation: Ensure supply of fresh air. In the event of symptoms take medical treatment.

After eye contact: In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of water. In case of irritation consult an oculist.

After skin contact: No special measures required.

After ingestion: Rinse out mouth and give plenty of water to drink. Do not induce vomiting. If swallowed, seek medical advice

immediately and show this container or label.

Proper waste disposal

Completely emptied packagings can be given for recycling.
